UKSOL Environmental and Sustainability Policy

UKSOL seeks to be a responsible business seeking to honour decent environmental and social standards.

Our primary purpose supply of solar PV energy solutions thus boosting clean energy capacity globally and serving to reduce emissions. Furthermore, we seek to 'walk the walk' and where possible adopt sustainable practices and values.

These key values are reflected in the following behaviours:

1. UKSOL is sustainable company promoting the sales of carbon reducing renewable energy systems.
2. UKSOL products reduce carbon emissions by reducing the use of grid mains power.
3. UKSOL has a mission to encourage individuals, businesses, organisations, and governments to replace fossil fuel electrical power generation with clean solar power globally.
4. UKSOL will endeavour to reduce waste by recycling and re-using office and factory supplies whenever possible.
5. Domestic and international travel should be replaced wherever possible with online meetings instead.
6. UKSOL as a company uses electronic document and accounting systems to reduce paper use and waste.
7. UKSOL employees are required to read and observe the UKSOL sustainability policy.
8. UKSOL factories are encouraged to source raw materials from sustainable sources and suppliers.
9. UKSOL employees, agents and contractors are encouraged to work from home to reduce the need for office space and travel to work.
10. UKSOL solar PV modules have a long product life of 30 years+
11. UKSOL products can be recycled. Customers are encouraged to recycle at the end of the 30-year product life
12. UKSOL has applied to be a member of PV Cycle.
13. UKSOL will review this Environmental and Sustainability Policy on an annual basis.
