

Why Choose UKSOL Solar PV Modules?

We understand there is a lot of choice on the global solar market when it comes to buying solar PV modules. So why should you consider UKSOL solar panels over other well-known brands?

- UKSOL is a unique British solar panel brand offering British standards of trusted product quality and after sales service.
- UKSOL offers extremely competitive prices which can compete with well - known Chinese brands.
- When you buy UKSOL products, payment goes through trustworthy British banks which reduces the risk of fraud.
- We offer a trustworthy, claimable, no quibble, 30-year British warranty.
- Many companies offer long warranties, but will you be able claim on the warranty later? Some suppliers blame the installer when a problem arises or ignore the warranty claim request. We know this to be true from experience after many years in the solar PV business.
- Having a strong, claimable warranty is especially important. For example, if you import 1000 panels for a high-profile customer and there is a problem with the panels, will your current supplier replace them quickly? If not, you have a serious problem on your hands! The bottom line is that UKSOL cares very much for all its customers. We act quickly if there are any issues.
- UKSOL uses the latest solar technology and design innovations, including half-cell, bifacial and multi-bus bar cells.
- We offer fast, low cost, FOB or CIF, global shipping direct from our factories in Spain and China.
- UKSOL has strict quality control procedures. Our modules are produced to ISO standards which are certified by TUV-SUD in Germany and others such as INMetro in Brazil and SONCAP in Nigeria.
- UKSOL PV modules have also been certified by MCS which is a unique British standard for renewable energy products. We can also offer independent factory testing by SGS before shipping.
- UKSOL can ship orders from 100 to 50,000+ panels! We have high capacity factories which can produce your order within two weeks for container orders, faster than many multinational brands.
- UKSOL has specialist expertise in exporting to Africa, Asia, the Caribbean, Europe the Middle East and South America. We have shipped to over 40 countries.
